

eCAPS® Bridge for Revit®

Greenheck has introduced an add-in for the Autodesk Revit® program called the **eCAPS® Bridge**. This add-in allows users to directly access eCAPS® without having to leave the Revit® software. Perform quick and easy product selections before downloading the Revit® content to your file.

Save time by using the **RESELECT** function which allows users to quickly modify selections for LOD300 families without having to delete the file and start over.

Features include:

- Access to a large library of Level of Development (LOD) Revit content.
- Access saved selections from your eCAPS account.
- Generate equipment schedules.

[CLICK HERE](#) to watch a video on how to download and use the eCAPS® Bridge.

Start streamlining your workflow and simplify your product selection process today!

Need help downloading this add-in? Contact your local Brucker salesperson for software selection assistance, product selection guidance, or technical questions.
